

Competitor Benchmark

Desk Booking & Floor Mapping - Eptura, Bookker, NeOffice, WorkInSync, Skedda vs SoCampus Facility Management

Feature benchmark of five competitor platforms compiled from public documentation, help centers, product pages, pricing pages and app-store listings. **Bold text marks standout / extraordinary features** - capabilities beyond our current product and roadmap that differentiate that competitor. The final page is a single comparison slide.

Platform	Who they are	Positioning & pricing
Eptura (Engage / Workplace)	US worktech giant (iOFFICE + SpaceIQ + Condeco + Proxyclick + Teem + Archibus). Gartner MQ Leader.	Enterprise IWMS: sensors, AI booking, CAD space planning, deep MS365. Quote-based (~\$10-15/user/mo, 3rd-party est.).
Bookker (Bookker Corporate SL)	Madrid, 2018. Clients: Telefonica, Toyota, Danone, Itau. 200k+ workstations claimed.	AR-first booking via hardware-free paper tags. Modular quote-based pricing. Weak Play Store rating (1.9/5).
NeOffice (Agiledge)	Bengaluru, 2011 (Agiledge Process Solutions; transport-automation heritage). Clients: Visa, Siemens, UBS, Intuit.	One app: desk + rooms + visitor + parking + cafeteria + employee transport. Public per-asset pricing: \$2.25/desk/mo.
WorkInSync (MoveInSync)	Bengaluru, 2009 commute company; workplace SaaS since 2020. 400+ enterprises, 1.1M+ monthly users. Clients: PwC, Nissan, AB InBev.	Commute + workplace in one platform; NLP booking, kiosks. Public pricing: \$2.25-3.59/user/mo tiers.
Skedda	Boston/global SaaS; 7,000+ customers, 3.1M users. Clients: Deloitte, Samsung, Harvard, Toyota. G2 4.8/5, #1 Space Management 3 yrs running.	SMB-to-enterprise desk scheduling. Per-SPACE pricing (unlimited users) from \$99/mo; free custom floor-plan build in 24-48h; no-code rules engine.

Contents

- 1. Eptura (p2) · 2. Bookker (p3) · 3. NeOffice by Agiledge (p4) · 4. WorkInSync by MoveInSync (p5) · 5. Skedda (p6)
- 6. Standout features worth stealing (p7) · 7. Comparison slide - all five vs ours (final page, landscape)

1. Eptura (Engage / Workplace)

Desk booking

- Channels: web, iOS/Android, Microsoft Teams app, on-site kiosks (Outlook add-in = rooms only). Hot-desking + hoteling; desks, lockers, parking and booths as bookable 'personal spaces'; hourly/shift booking; recurring with per-instance edits; book on behalf of others.
- Check-in: manual, QR, **geofence proximity (~250 m)**, kiosk, **sensor-based automatic check-in** and **badge-swipe check-in** (add-on).
- Auto-release ('bump'): per-group check-in windows, staggered arrivals; no check-in = desk auto-released.
- **Condeco Presence sensors: auto-release of no-shows AND early-vacated desks, plus auto-created 'walk-in' bookings when sensors detect someone at an unbooked desk.**
- **AI booking (Power tier): auto-books a desk when you set status to 'in office', learned from team seating + past patterns; Copilot conversational booking inside Teams.**
- Amenity search, desk profiles, key-worker flags (fire marshal / first aider) on plans; health self-certification at check-in.

Floor maps & space planning

- Interactive plans with live availability on web/mobile/Teams/kiosks; colleague finder.
- **Digital-twin floor plans with AutoCAD/Revit import (Autodesk Alliance), neighborhoods with target seat ratios, utilization overlays and predictive capacity analytics.**
- **Visual Block & Stack scenario planning for team moves; 3D wayfinding kiosks ('You Are Here').**

Analytics, admin, notifications & platform

- **Power BI analytics incl. no-show behavior reports, scheduled hybrid-work reports, data-warehouse connection; quarterly Workplace Index benchmark from their own booking data.**
- Advanced Reports export to Excel/PDF; Admin: advance windows, duration limits, per-desk permissions, restricted neighborhoods, cost codes, **post-use cleaning workflows**, QR management, admin check-in on behalf.
- **Actionable email nudges: if presence isn't detected, one tap in the email keeps or cancels the booking;** Teams notifications; no native Slack (Teem only).
- Platform: SAML SSO, Azure AD/Okta/SCIM, open REST API + dev portal, room/desk screens + kiosks via Device Hub; sensor partners Relogix/PointGrab/VergeSense; badge partners Brivo/Kisi; ISO 27001.

Sources: eptura.com (desk-booking, pricing, Condeco Presence PR) · condecosoftware.com help · knowledge.eptura.com. Unverified: per-desk vs per-user licensing; 3D inside Engage itself.

2. Bookker (Bookker Corporate SL)

Desk booking

- Flows: form search with map/list pick; direct calendar-slot booking; **'reserve a random seat' auto-assign and 1-click booking from saved preferences.**
- **AR booking (flagship): point the camera at a hardware-free paper/sticker tag to see live status (free/occupied, who, equipment) and book or check in on the spot.**
- Check-in: per-resource pre-check-in window + check-in (grace) window; automatic expiry releases the desk; check-out frees it early.
- Recurring 'repetitions' incl. partial-lot booking of only available dates; supervisor group bookings with guest check-in/out.
- **'Cession': a fixed-desk owner temporarily releases their desk for others to book; auto desk allocation on building entry via access-control integration (no prior booking needed).**

Floor maps, presence, analytics & admin

- Interactive 2D plans (pick desk on plan); zones via 'Groups' restricting who books what; no 3D found.
- Presence: tag-scan based + optional Nespra occupancy sensors, Dorlet access control, Equinsa/Skidata parking barriers, Woffu HR sync.
- **Work statuses (office / teleworking / vacation) that auto-release or assign fixed resources.**
- Analytics: usage metrics + Power BI integration (report depth login-gated / unverified).
- Admin: usage rules (advance + check-in windows), locking of buildings/floors/resources, holiday calendars that block booking, roles/supervisors.
- Notifications: email + push, user-configurable per type. Platform: **API-first 'Bookker Integration Platform' (18 integrations)**, Entra ID/Google SSO, Teams video links; iOS/Android/web in 5 languages.
- **Extras: smart parking with EV chargers and space cession; canteen shift booking;** visitor management (shallow docs).

Sources: bookkercorp.com (solutions, augmented-reality, integrations) · help.bookkercorp.com · app stores. Caution: Google Play 1.9/5 (~271 reviews) - stability complaints. Unverified: QR vs proprietary tags, NFC/geo check-in, no-show reports.

3. NeOffice (Agiledge Process Solutions)

Desk booking

- Flows: mobile app (iOS/Android) for employees, web app for admins; booking via Slack, Teams, Outlook and Google Calendar claimed. Search -> pick seat on interactive floor plan -> book -> **digital 'Office Pass' ticket, also usable as an office entry pass** -> QR check-in at desk.
- Check-in/out: contactless QR at the desk; kiosk/room-display walk-up booking. No geofence/beacon documented.
- Auto-release: business rules return no-show seats to the common pool (grace values configurable, not public).
- **Employee scheduling / rostering: roster teams to desks day-wise or by shift (e.g., Mon-Wed-Fri vs Tue-Thu-Fri) at project/team/department level, linked to a holiday planner.**
- Booking modes: hot desking, hoteling, team seating (zones reserved per team), rostering; **manager auto-allocation of team seats and on-behalf scheduling with approvals.**
- **'Find My Friend': search where a colleague sits and book a seat next to them.**

Floor maps, analytics, admin & notifications

- Interactive real-time 2D plans with zones per team/function; distance-planning logic; no 3D advertised.
- Analytics: occupancy tracker, utilization dashboards, no-show %, auto-generated 'Insights' reports, **industry benchmarking claim**, contact-tracing download; centralized audit reports.
- Admin: per-team business rules (booking windows, advance limits), custom permissions, zone blocking, multi-location, manager approvals.
- Notifications: email, **SMS**, push; auto-triggered event alerts; visitor-arrival alerts.
- Integrations: AD/SAML/Okta/OneLogin/Keycloak SSO; Google/O365; **HRMS: Workday, PeopleSoft, Darwinbox, PeopleWorks**; open REST API.
- **One-app suite: employee transport (myATOm) + on-demand travel + cafeteria 'Book my Meal' + parking + NeoVMS visitor kiosk with badge printing - commute booking inside the same app is rare in this market.**
- **Public per-asset pricing: desks \$2.25/seat/mo, rooms \$15/room/mo, visitor \$40/location/mo** - simple and cheap vs enterprise rivals.

Unverified: grace timings, biometric/access-control integration, WhatsApp, export formats.

4. WorkInSync (MoveInSync)

Desk booking

- Channels: mobile + web, MS Teams marketplace app (desks, rooms, meals from within Teams), Outlook add-in, Slack (Professional tier).
- Interactive floor-plan seat selection with real-time availability across floors/locations; desk amenity tags (standing desk, docking station) with preference-based filtering.
- Hot-desking, hoteling and fixed/permanent assignment per desk; managers/admins book on behalf; rostering tool + team neighborhoods + shared team calendar.
- **NLP-based booking (Enterprise tier): book in natural language.**

Check-in & no-show handling

- **Multi-model check-in: QR, Wi-Fi-based presence, geofencing, kiosk - and access-card swipe that CREATES the booking/check-in automatically (Honeywell, Dormakaba, Johnson Controls, OGTech).**
- Auto-release of 'ghost bookings' for desks and rooms ('100% ghost meetings reduced'); ghost-reservation management from Professional tier. Grace-period config not public.

Maps, presence, analytics, admin & platform

- Interactive plans + live availability from Standard tier; neighborhoods/zones; colleague finder; **internal wayfinding & navigation (Enterprise); touch floor kiosks (multi-language, ADA-compliant) with foot-traffic analytics.**
- **Occupancy sensor integration, Cisco Room Navigator (live occupancy + air quality + sound), Clairco air-quality, attendance capture (Enterprise);** access-control + guest Wi-Fi integrations; ANPR license-plate recognition for parking.
- Analytics: advanced usage analytics; Enterprise adds custom dashboards, executive insights, **analytics API, unlimited exports, utilisation-based billing & cost-centre reports;** auto-scheduled email reports (visitor data confirmed); marketed outcomes: **4:1 employee-to-desk ratio, up to 23.5% space-cost savings.**
- Admin: reservation rules & policy management, booking overrides, RBAC/custom roles, multi-location, auto desk allocation, **'Smart Nudges'**, service requests, room catering, sustainability features.
- Platform: SAML 2.0/OAuth2/Okta/OneLogin/AD/SCIM; Google + MS365; HRMS via SCIM/APIs; Intune MDM; badge printers; open APIs.
- **Structural differentiator: commute (cab/shuttle/carpool ETS with routing, tracking, SOS) + workplace in one 'MoveInSync One' app;** cafeteria with **food-waste analytics;** parking with waitlists.
- **Public pricing: Standard \$2.25 / Professional \$3.20 / Enterprise \$3.59 per user/mo (annual), min 250 employees; G2 ~4.6.**

Sources: workinsync.io (desk-booking, pricing, integrations, floor-kiosk, glossary) · moveinsync.com · app stores · G2. Unverified: recurring desk bookings, Slack depth, WhatsApp, grace config, current Capterra score.

5. Skedda

Desk booking

- Channels: web, native iOS/Android apps, Microsoft Teams app, Slack app; booking 'in three clicks' from the interactive map; hot-desking, hoteling and assigned desks (occupant name + photo on map, Premier tier) on the same plan.
- Repeat bookings (e.g., same desk every Wednesday); admins and custom-admin roles book on behalf of anyone; desk attribute tags (dual monitor, standing desk) with photos; custom booking fields; neighborhoods with per-zone access rules.
- **7 check-in methods: web, mobile, one-time email link (no login), QR at the desk, automatic Wi-Fi presence detection, Slack message, Teams message.** No geofence/GPS; no kiosk check-in for employees.
- Auto-release: per-tag/space check-in rules; **fully configurable grace window (open up to 24h before, close up to 24h after start)**; no-show bookings auto-deleted by background worker with email notice; **'log-only' non-destructive mode for gradual rollout**; short-notice bookings auto-check-in.

Floor maps, analytics, admin & platform

- **Custom interactive floor plan built for you by Skedda's team from any file (PDF/CAD/PNG/sketch) within 24-48h, free - even on trial**; live availability; colleague visibility; 2D only, no wayfinding/3D.
- **Wi-Fi-based occupancy tracking ('seen on site') verifies real attendance vs bookings with zero hardware**; Kisi access-control integration; visitor management add-on (\$99/mo) with tablet check-in and host alerts.
- Insights dashboard: utilization by user/team/space/floor/zone/day/time, peak days, **no-show rates and check-in-method analytics**; XLSX/CSV export, PDF print; no scheduled email reports found.
- **Deep no-code rules engine: booking conditions, advance windows, per-person/group quotas (e.g., 5 bookings/week), buffers, cancellation lock-ins, booking approvals**; space blocking via internal bookings; custom admin roles scoped to spaces; Organization Hub for multi-office management.
- Platform: **SAML SSO on ALL plans** (Entra, Okta, OneLogin, Google), SCIM (Premier); two-way MS365/Google calendar sync w/ Zoom/Webex links; Zapier + outgoing webhooks; **no public write API (deliberate)**.
- **Pricing model unique in this set: per-SPACE, unlimited users - Starter \$99/mo (15 spaces), Plus \$149-249/mo, Premier \$199-349/mo, Enterprise custom. G2 4.8/5, #1 in Space Management three years running.**

Sources: skedda.com (desk-booking, office-floor-plan, pricing, analytics, visitor-management, integrations) · support.skedda.com (check-in, insights, occupancy tracking) · G2/Capterra (~4.8, counts approximate). Unverified negatives: no geofence, no 3D, no sensors, no scheduled reports, no write API.

6. Standout features worth noting (the 'extraordinary' list)

Features no one in this set does ordinarily - candidates for our differentiation backlog:

Eptura	Sensor-driven walk-in detection (auto-creates a booking when someone sits at a free desk); AI auto-booking from 'in office' status + Copilot in Teams; AutoCAD/Revit digital twins with block & stack planning; one-tap keep/cancel emails when presence isn't detected.
Bookker	AR tags: zero-hardware paper stickers turn any desk into a live bookable object through the phone camera; desk 'cession' (owners lend out fixed desks); auto desk allocation the moment you badge into the building.
NeOffice	Find My Friend seat search + book-next-to-colleague; digital Office Pass doubling as entry pass; day-wise team rostering tied to a holiday planner; employee commute booking (myATOM) in the same app; transparent \$2.25/desk pricing.
WorkInSync	Badge-swipe that creates the booking automatically; NLP booking; utilisation-based billing / cost-centre chargeback; ADA-compliant floor kiosks with foot-traffic analytics; Cisco Room Navigator with air-quality + sound; cafeteria food-waste analytics; commute + workplace unified app.
Skedda	Per-space pricing with unlimited users; free custom floor-plan build in 24-48h from any file; Wi-Fi presence detection with zero hardware; 7 check-in methods incl. no-login email links; log-only rollout mode for auto-release; no-code rules engine with quotas and buffers; SAML SSO on every plan; G2 4.8 category leader.
Pattern	All five monetise presence data (sensors/badges/Wi-Fi) and multi-module bundling (parking, cafeteria, visitor, commute). Only Eptura has CAD import and 3D. Skedda proves auto-release can ship softly (log-only mode) - worth copying in our Ph1 sweeper rollout. Our approval-chain engine, multi-tenancy and pantry/meal ordering remain unmatched in this set.

7. Comparison slide: all five vs SoCampus Facility Management

Bold = standout capability. Ours: (Ph1)/(Ph2) = roadmap phase.

Capability	Eptura	Bookker	NeOffice (Agiledge)	WorkInSync (MoveInSync)	Skedda	Ours (SoCampus FM)
Booking core	Yes. Web/mobile/Teams/kiosk; hoteling+hot-desk; hourly/shift; recurring; on-behalf	Yes. App/web; random-seat + 1-click; AR on-the-spot; repetitions; supervisor groups	Yes. App/web; Slack/Teams/Outlook; rostering by shift pattern; Find My Friend	Yes. App/web/Teams/Outlook/Slack; amenity filters; NLP booking	Yes. Web/app/Teams/Slack; 3-click map booking; repeat bookings; amenity tags; neighborhoods	Yes. Web (responsive); seat picker; shared/capacity; approval chains; email reschedule/cancel
Check-in & auto-release	Yes. QR, geofence, sensor, badge; per-group windows; bump; walk-in detection	Yes. Tag scan; grace window; auto expiry	Yes. QR at desk; no-show back to pool; Office Pass = entry pass	Yes. QR, Wi-Fi, geofence, kiosk, badge-swipe-creates-booking; ghost release	Yes. 7 methods incl. no-login email link + Wi-Fi auto check-in; configurable grace; log-only rollout mode	No. today Planned (Ph1): check-in API/UI, grace, sweeper, audit log, QR
Floor maps	Yes. Live plans; CAD/Revit twins; neighborhoods; 3D wayfinding; block & stack	Partial. 2D + AR tag view; Groups as zones	Partial. 2D live plans; team zones	Yes. 2D live plans; neighborhoods; wayfinding; floor kiosks	Yes. 2D live plans; custom map built free in 24-48h; assigned-desk photos; no 3D	Partial. 2D SVG editor + seat picker; CV chair auto-detect Planned (Ph1): floor-level live map
Presence / attendance	Yes. Sensors (VergeSense etc.), badge data	Partial. Tag-scan; optional sensors/access ctrl	Partial. QR-based; API integration claimed	Yes. Sensors, access control, attendance capture, air quality	Partial. Wi-Fi 'seen on site' - zero hardware; Kisi access ctrl	No Planned (Ph2): biometric attendance + no-show/walk-in reconciliation
Analytics	Yes. Power BI; no-show reports; scheduled reports; benchmark index	Partial. Usage metrics; Power BI	Yes. Occupancy, no-show %, insights, benchmarking	Yes. Custom dashboards; analytics API; utilisation-based billing	Yes. Utilization by team/zone/time; no-show + check-in-method analytics; XLSX/PDF; no scheduled reports	Partial. Today-only dashboard + Gantt Planned (Ph1): trends, peak, exports, scheduled reports
Admin controls	Yes. Rules, windows, restricted desks, cleaning workflows	Yes. Usage rules, locking, holiday calendars	Yes. Per-team rules, zone blocking, approvals	Yes. Policies, overrides, RBAC, auto desk allocation	Yes. No-code rules engine: conditions, quotas, buffers, approvals; custom admin roles; Org Hub	Partial. Advance rules, per-user limits, slot capacities, approval chains Planned (Ph1): desk blocking, grace config, monitoring
Notifications	Yes. Actionable keep/cancel emails; push; Teams/Copilot	Yes. Email + push, configurable	Yes. Email, SMS, push	Yes. Push, email, Smart Nudges	Yes. Email, push, Slack + Teams reminders; 2-way calendar sync	Partial. Rich email w/ one-click actions Planned (Ph1): reminders, release notices, alerts
Beyond desks	Yes. Visitor, rooms, space planning, IWMS suite	Yes. Parking + EV, canteen, visitor	Yes. Employee transport, cafeteria, parking, visitor kiosk	Yes. Commute, cafeteria + food-waste analytics, parking ANPR, visitor	Partial. Rooms; visitor add-on (\$99/mo); AllBooked venue product; no parking/cafeteria	Yes. Rooms/gym/pool, pantry/meal ordering, public portal, multi-tenant SaaS
Pricing	Quote-based (~\$10-15/user/mo est.)	Quote-based, modular	\$2.25/desk/mo public	\$2.25-3.59/user/mo public	Per-SPACE from \$99/mo, unlimited users; G2 4.8	Internal / per-deployment

Takeaway: Phase 1 closes the check-in/auto-release, floor-map, analytics and admin gaps to parity with all five. Phase 2 biometric integration matches their presence validation without sensor hardware. Differentiation candidates from the standout list: badge-swipe/entry-driven auto check-in (WorkInSync/Bookker pattern fits our Ph2 biometric feed), Find-My-Friend seat search (cheap extension of our Ph1 team-visibility milestone), actionable keep/cancel emails (fits our existing action-token mailer), and Skedda's log-only rollout mode for the auto-release sweeper (ship it observing-first, then enforce).
